## "A NEW FLIGHT PATH"

### EXPLORING THE FUTURE OF AIRPORTS IN COMMERCIAL SYNERGIES & REGULATORY LANDSCAPES

1. **EASA Ground Ops** and **trending limitations** on number of service providers seen as a **positive** development. Further **development of tender criteria** desired.

i.e. on Process, Structure, Rating, Influence by stakeholders  
(tender decision = start of uncertainties)

2. **Commercial strategies** in view of **GHA's operational needs:**

- variety of operating standards, (i.e. on IDs and permits)
- adequacy of infrastructure  
(confined ERAs and bag sorting infra, ongoing constructions, office and parking spaces, charging points, IT connectivity, data exchange...)
- GHAs left to deal with effects

Aren't there ways to collaborate on a competitive European aviation market, while being attractive employers, innovative, professional, and putting safety first?

## WHAT DO WE NEED

1. We welcome **fair rules of engagement**, i.e., tender requirements and decision criteria, operating standards, accessibility criteria.
2. We hope for an increased **focus on the human capital** in an escalating competitive environment, to retain a high level of **professionalism** and **attractiveness** in the labour market.
3. We recommend a holistic approach in legislative and strategic planning, addressing the **complete value chain**, targeting **integrated solutions** and considering **GHAs as business partners**.
